EDUFARM PROJECT

&

PRONERA
National Education Program in
Agrarian Reform
College of Agricultural Engineering

2008-2011

Edufarm Project was conceived to give lectures of technical and environmental subjects that affect rural communities.

Practically all 300 children from elementary and high schools attended by the project helped their parents growing crops and raising farming animals, but at schools no adequate content could improve the agriculture directly.

Therefore, with a partnership with Barreiras City Council, students from Agronomy in the last semester (obligatory internship) were trained pedagogically to use the right way to work with children. Lessons covering the basis of agriculture and livestock production were worked. The participation of their parents was singular. They received the classes for technical visits and exchange the knowledge unifying traditional and technical knowledges.

The project elevated the self-esteem was small producers and their children could see their activity as important, reducing rural exodus to cities to get a better life.

Education – Elementary to high school

The pilot project was highly accepted by society with great impact in the media.

um destes espaços foi possível aos estudantes, através de demonstrações, discussões e práticas, conhecer noções sobre bovinocultura, avicultura caipira, suinocultura, horticultura, fruticultura, biocombustíveis e utilização de plantas nativas.

“Esse momento é a concretização de um sonho, de fortalecer a educação do campo com a política da valorização dos saberes transmitidos de pais para filhos, aliados ao conhecimento formal construído pela Universidade”, ressaltou a coordenadora geral da Secretaria Municipal de Educação, Aayla Figueiredo.

Segundo o coordenador do Curso de Agronomia da Uneb Danilo Gusmão, os alunos assistidos pelo projeto são filhos de agricultores. “A maioria das crianças

After this project, the Bahia State University set an agreement with social organizations and the Brazilian National Government for technical and college levels of education to land reform, expanding the technical knowledge to improve the economic and social situation of the communities.
