**Describe the Special Project** (each student intern will develop or guide and evaluate one project beyond regular daily activities; student, internship field supervisor, and program directors will review and agree to the Special Project).

I agree to the *Science Influencers* Summer Internship Program rules and expectations as described in the Internship Program Guidelines. I understand this internship includes specified hours of work activities with a cooperating internship sponsor, and that I will produce blog posts, reflective writing, and self-assessments as internship products. I understand also that I will develop and submit a scientific poster or an oral presentation about the internship at the *Science Influencers* annual fall research symposium. If I enroll in additional credits (Directed Studies or Research), I will prepare materials suitable for publication and dissemination through the *Science Influencers* program.
